Global leadership in multimodal AI and machine learning covering 150+ languages

## PULSE FOR CYBER RISK ENABLES KEY USE CASES

**Cyber-Physical Risk:** Respond to real-time alerts on cyber threats affecting physical assets, and vice versa.

**Third-Party Risk:** Mitigate risk to your organization with increased visibility into threats to your subsidiaries and third parties.

**Vulnerability Intelligence:** Prioritize patching with visibility to the entire lifecycle of a vulnerability.

**Digital Risk:** Respond quickly to early warning of risks to your organization's digital assets.

# Spot the earliest signs of emerging threats and vulnerabilities with Dataminr Pulse for Cyber Risk integrated with MS Sentinel.

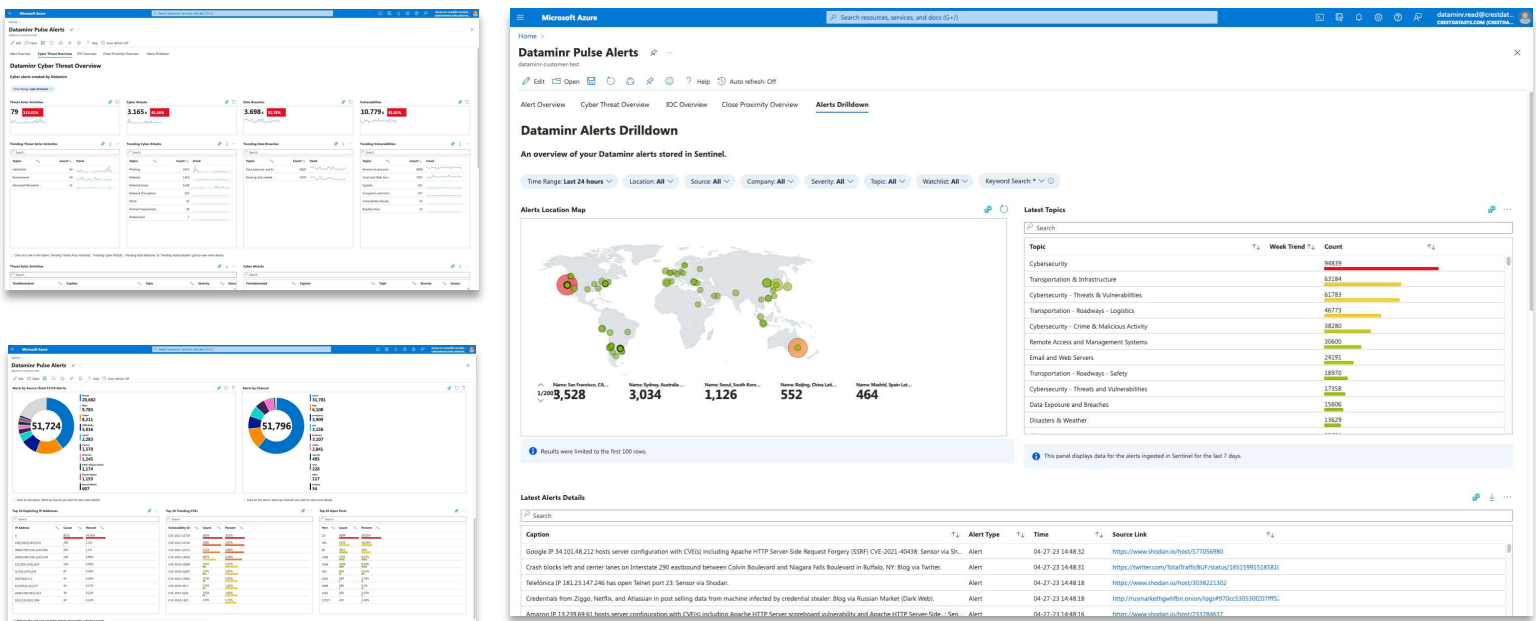

## SWIFTLY CLOSE THE LOOP FROM INSIGHT TO RESPONSE

Dataminr Pulse for Cyber Risk AI-powered alerting combined with Microsoft Sentinel enables cybersecurity teams to get actionable insights at scale, and make rapid and informed decisions, to **prioritize and manage risk instead of searching for it.**

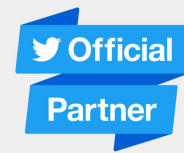

## ACCELERATE YOUR WORKFLOWS

- ❑ **Create alerts** on trending external threats and vulnerabilities.
- ❑ **Improve incident investigation and response.**
- ❑ **Determine threat identification, scoring and classification** by type, severity and status.
- ❑ **Enrich and accelerate triage** with AI-powered intelligence.
- ❑ **Support analysis and threat hunting** workflows.
- ❑ **Assign threats** to analysts and teams.

## VISUALIZE THREATS IN REAL TIME

G2's 2023 Winter Reports are out, and Dataminr earned 23 badges, including **Best Support**, **Leader in Enterprise**, **Easiest Admin**, and **Easiest to Do Business With**.
